PERSONNAL PROFILE

Having been interested in IT for a long time and facing a deep restructuring of my current company, I have decided to do a training program to be able to start a new life in IT development. The exponential growth of IT services shows us there are many projects to lead or to develop in Web applications, A.I., data management, or security.

I have joined the FORMATION31 IT Development School in Toulouse, in higher education, to do a training program in web project development and management. My training program took place from the 25th March 2019 to the 19th February 2020.

Successfully graduated, I am ready to join you !

ACHIEVEMENTS

2019 – 2020 / SYMFONY & ANGULAR PROJECTS

Creation of a website and personalized Content Management System under Symfony for a client : Fauna Flora.

Creation of an app under Angular for mobile phone in order to prepare my final developer exam.

2016 – 2020 / FRENCH LABOUR MINISTRY POLE EMPLOI

I have a range of work experience that have taught me management and leading project skills.

In this previous job I have gained 2 years of experiences in managing projects.

I have managed my team to analyze weak results and to achieve an increase of 22% in productivity, by focusing on quality processes and policy changes.
